OCTOBER 2020

STREET IMPROVEMENT PLAN

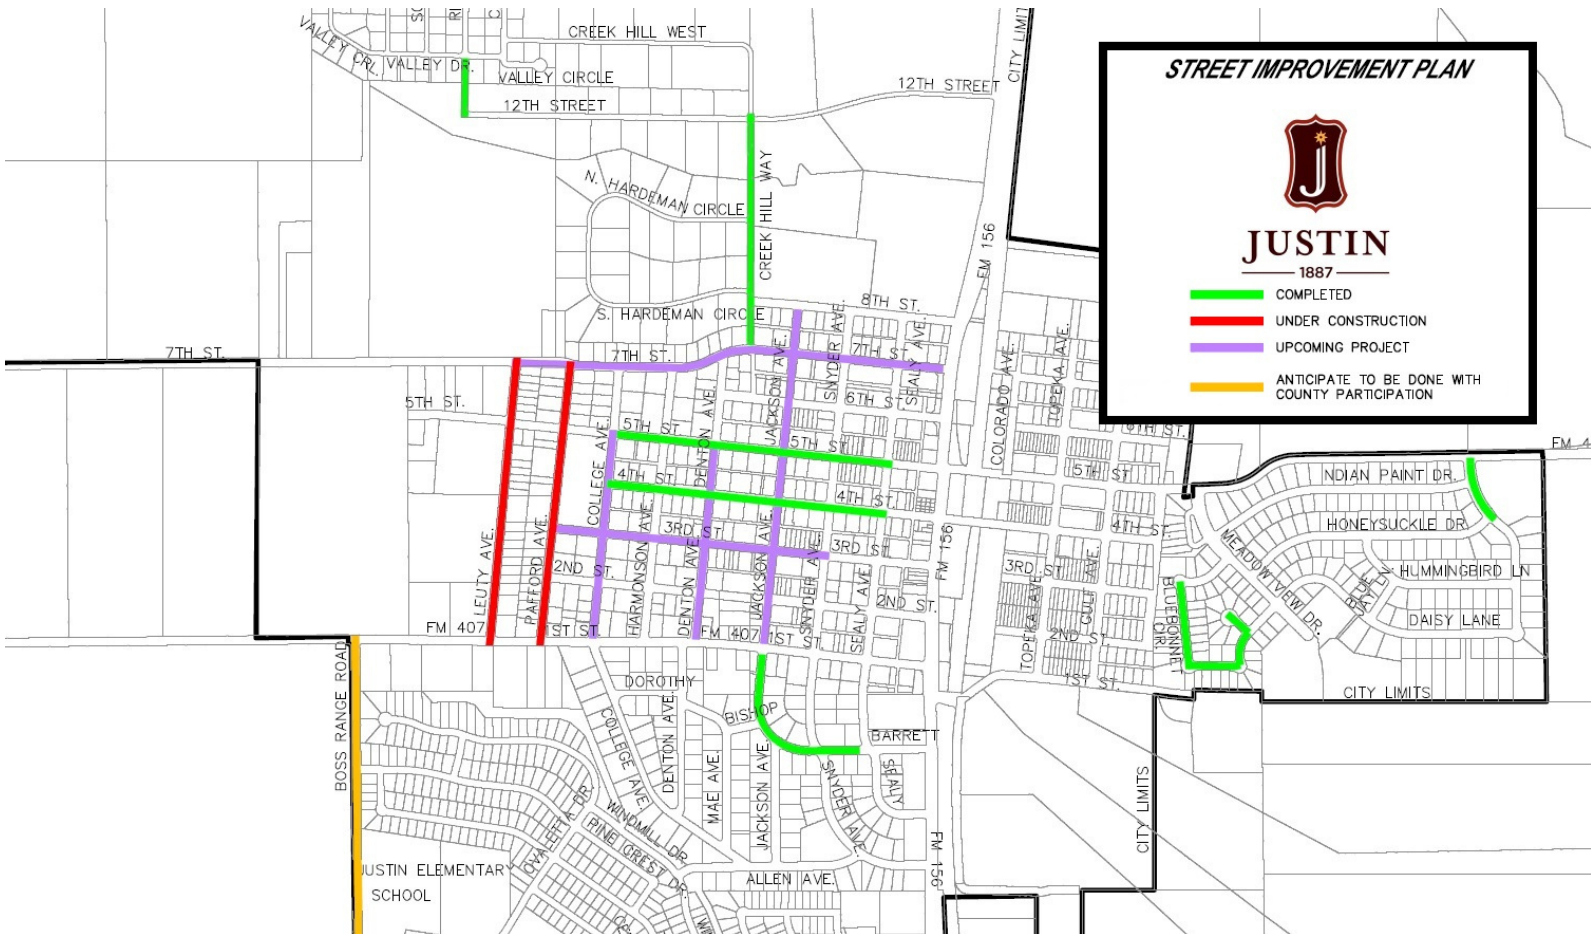

In November 2018, voters approved the reallocation of a portion of the city's sales tax revenue for the dedicated purpose of street maintenance and repair. The City approved a Street Improvement Plan last year and has begun to undertake projects from that plan.

The first project was the complete reconstruction of Jackson/Barrett. The second complete reconstruction project is currently underway on Pafford and Leuty Ave.

In addition to the reconstruction projects, the City has identified, through a full street assessment, which roadways are most in need of maintenance and repair. The City anticipates to award contracts annually for the needs identified in the street improvement plan.

In 2019, the City awarded contracts for concrete panel replacements and mill and overlay of certain asphalt roadways. Projects completed this year are shown in green below.

The areas shown in purple are some of the next streets to be repaired with funds from this new sales tax allocation.
